

BRAND SIZING METHODS

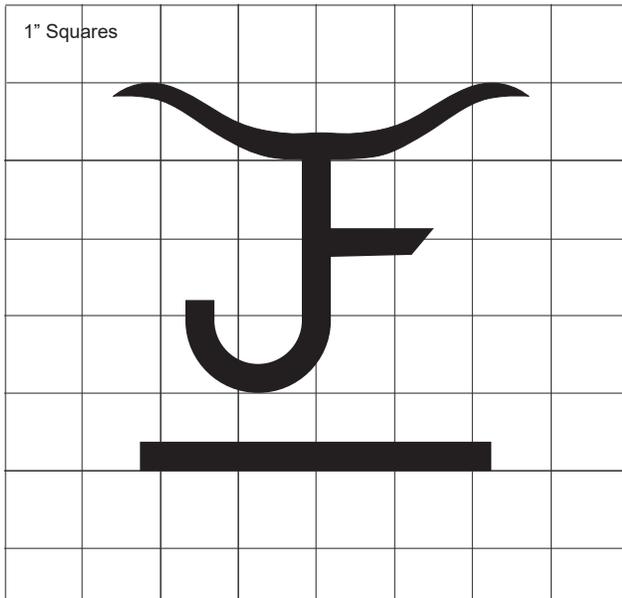

When ordering a brand we will need to know the sizing that you want the brand made, since there is no exact “calf” or “cow” size brand nor “normal” or “standard” size brand we will need to know the dimensions that you want the brand made. You can use the “sketch form” to draw your brand design in the size that you would like it made or you can note the brand dimensions on the artwork as shown below. This will give us a place to start as adjustments may need to be made based upon our conversations and your use for the brand.

Draw exact size on grid paper
